

## **Collaboration Category for the 2018 Community Student Art Exhibition**

### **PROPOSAL:**

Art teachers will select students or a class to work collaboratively in designing an artwork. In collaborative learning, student cooperative group activity is intertwined throughout the process, resulting in a product that many hands have made. These resulting artworks will be displayed together and judged in a separate category in one of the Box Factory galleries. By creating artwork of this nature, we envision several goals being accomplished.

### **GOALS:**

- Increase the number of entries and give more students an opportunity to participate
- Encourage artistic growth
- Create a sense of pride and recognition with an increased number of students
- Create positive activities for students
- Fulfill component of common core state standards
- Accomplish shared goals
- Encourage team building, communication skills and problem-solving techniques
- Help each student to understand the *group goal* and how *they* contribute to it

Look at the registration form to enter your students in the Collaborative category.

**\*\*Collaborative pieces count towards your school's allotted 30 pieces for the show.\*\***
